JobOptim

JOB MANAGEMENT FOR SMALL CONTRACTORS. FROM THE MAKERS OF CUTOPTIM.

Job management for small contractors

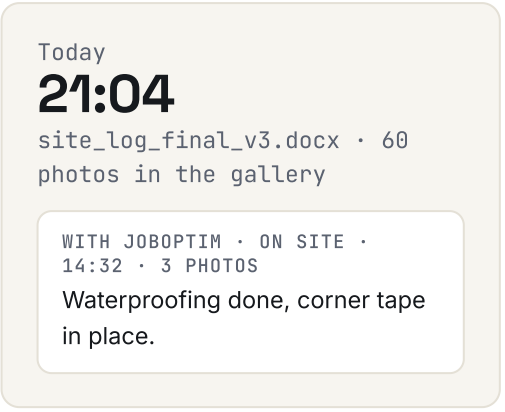

From inquiry to handover in one place. You take photos and dictate on site; your client sees how the job is going through a link.

- ✓ On your phone, nothing to install
- ✓ Your client needs no account
- ✓ Hosted in the EU

WHY

9 pm, Word, 60 photos.

You spend the day on site. In the evening you scroll through your phone for the right photos and try to piece together what got done, while the client keeps texting to ask how things are going. In JobOptim the entry is made on site, and the report is built from those entries.

WHAT YOU GET

Photos and dictation on site

One tap, a few photos, one sentence. Every entry gets a timestamp. If the signal drops, the entry waits in a queue and goes out when the connection is back.

The report puts itself together

Pick the entries and JobOptim builds a PDF report. Once finalised, it no longer changes.

Your client sees it

Through a link or QR code, and only what you mean for them. Internal entries stay internal, and you can revoke the link.

Client management

Contact details, jobs and the emails sent from each job, per client

Your own company website

On your own address (yourcompany.joboptim.com), with references from your jobs, and quote requests arrive as jobs. Editable from your phone, in light and dark mode.

HOW TO START

Have the report for your next job ready by the time you get home.

1. **Free account** — 14 days free, no credit card
2. **Request a quote** — support@joboptim.com
